Aneesh Khunteta

aneeshkhunteta@gmail.com | Personal Website | linkedin/aneesh-khunteta

Summary

Enthusiastic Software Engineer with 2+ years of experience in developing scalable web applications and backend systems. Proficient in writing clean, maintainable code and adept at troubleshooting complex issues. Demonstrates a strong ability to collaborate effectively with teams. Possesses robust debugging skills, particularly useful for resolving issues in legacy codebases.

Experience

Goldman Sachs **Bengaluru, Karnataka**
Software Engineer *Jun 2025 - Present*

- **Report Model Creation**: Automated regulatory report generation by building a standardized reporting model.
- **Case Initialization Service**: Developed a service to initialize cases and trigger processing workflows.
- **Tech Upliftment**: Modernized core services by migrating from Java 8 to Java 21 and upgrading the Spring Framework.
- **LDAP-Pagination**: Implemented Pagination over LDAP for secure data migration between data sources.

Whatfix **Bengaluru, Karnataka**
Software Engineer *Jul 2024 - Jun 2025*

- **AI Generated Insights**: Developed a service that uses AI to create and summarize Insights and suggest action points.
- **Dashboard Redesign**: Redesigned and optimized Dashboard for User Actions, improving process speed by **30%**.
- **Service Migration POC**: Conducted POC for service migration of User Action management, reducing downtime risks.
- **API & Bug Fixes**: Updated APIs for P2P packaging and resolved major bugs, boosting data quality.
- **Automation**: Developed and optimized scripts, improving testing reliability and reducing runtime by **25%**.

Full Stack Engineer Intern *Jan 2024 - Jun 2024*

- **Build & Testing Automation**: Automated sandbox build, deployment, and testing, cutting time by **60%**.
- **Testing Optimization**: Refactored legacy scripts, reducing runtime.
- **UI Enhancements**: Improved User Actions listing, increasing page efficiency and reducing load time by **15%**.

Skills

Languages Java, JavaScript, C++, C
Libraries ReactJs, STL
Frameworks NextJs, Express, Spring Boot
Search Elasticsearch
Cloud & Messaging AWS, Apache Kafka
Automation Ansible, Jenkins
Databases (SQL) MySQL, PostgreSQL
Databases (NoSQL) MongoDB, Cassandra, Redis

Education

LNM Institute of Information Technology **(2020 - 2024)**
Bachelor of Technology in Computer Science Engineering *7.58 CGPA*

Projects

Document Approval Tracker **NextJS | Express | MongoDB**

- Developed a system for submitting applications with document attachments.
- Enabled assignment of applications to appropriate authorities for review.
- Implemented approval/rejection workflows with supporting document uploads.
- Designed role-based access controls for secure data access at multiple user levels.

Maintenance Automation System **PHP | MySql**

- Built a campus complaints management platform to streamline issue resolution.
- Developed modules for complaint submission, tracking, and resolution by priority.
- Supported categorization of complaints across various departments and areas.
